

[Back to Week 1](#)[Lessons](#)

This Course: Advanced R Programming

[Prev](#)[Next](#)

next is used to skip an iteration of a loop.

```
1 for(i in 1:100) {  
2   if(i <= 20) {  
3     ## Skip the first 20 iterations  
4     next  
5   }  
6   ## Do something here  
7 }
```

break is used to exit a loop immediately, regardless of what iteration the loop may be on.

```
1 for(i in 1:100) {  
2   print(i)  
3  
4   if(i > 20) {  
5     ## Stop loop after 20 iterations  
6     break  
7   }  
8 }
```
